Do you have customers that wear nozzles out way too quickly? Ceramic nozzles will outlast stainless steel nozzles up to 4 times! If your customer uses his pressure washer constantly and the pressure is always low, this may be the answer.

Ceramic is an exceptional material :

The orifice of the ALBUZ TEC UAS range of nozzles is a white ceramic. This ceramic material was specifically developed for high pressures and, is almost as wear resistant as diamond. The properties of the ceramic material are the keys to successful industrial nozzles applications :

- High mechanical resistance
- Corrosion resistance
- High hardness
- Resistance to high temperatures
- Resistance to high pressures
- Exceptional wear resistance
- Ultra smooth surfaces

NEW NOZZLE
Céramic Stainless steel

NOZZLE AFTER 50 h TEST
Céramic Stainless steel

After hours of use with abrasive, corrosive and or high pressure fluids, traditional nozzles will deteriorate the internal hole, enlarging the diameter, increasing the flow rate changing the spray configuration and modifying the droplet size and distribution. Thanks to the exceptional material characteristics of the ALBUZ TEC ceramic material, the UAS nozzle range proves its cost effectiveness through longer life and better performances.

ROTATING NOZZLES

Strong brass structure
 Highly shock-resistant ceramic seat and nozzle
 High absorption of accidental bumps thanks to the plastic protection
 Can be used in any position thanks to the system equipped with internal spring eliminating the clearance between seat and nozzle in order to maintain a longer life span.
 The smooth rotation guarantees an aggressive or delicate wash in ratio with the cleaning distance.

Sewer Nozzles

Non-rotating style:

- ◆ 4200 PSI max. pressure
- ◆ Backward ports drive the nozzle forward and flush debris
- ◆ Forward port blasts into and breaks up clogs/debris

Non-Rotating Style

Note - There is no forward port on the 1/8" size in the Non-Rotating Style and also no forward port in all three of the Rotating Style nozzles.

- ◆ Corrosion free stainless steel construction
- ◆ Physically small for cornering ability

Rotating style:

- ◆ 3000 PSI max. pressure
- ◆ Rotating style adds extra agitation and surface cleaning
- ◆ Suttner #ST-49
